

EXERCISE

ShopHub Landing Page – React Fundamentals Assignment

You must build the following components and assemble them into a **Home Page**:

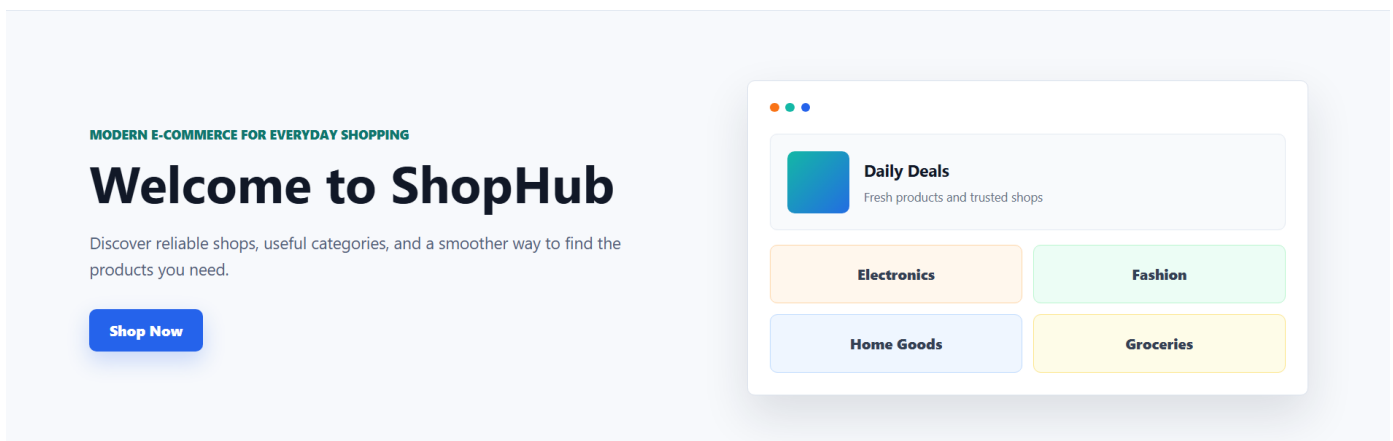

1. Header

- Displays the project name (e.g. “ShopHub”).
- Contains a simple navigation menu with at least these items:
 - Home
 - Products
 - Cart
 - Login

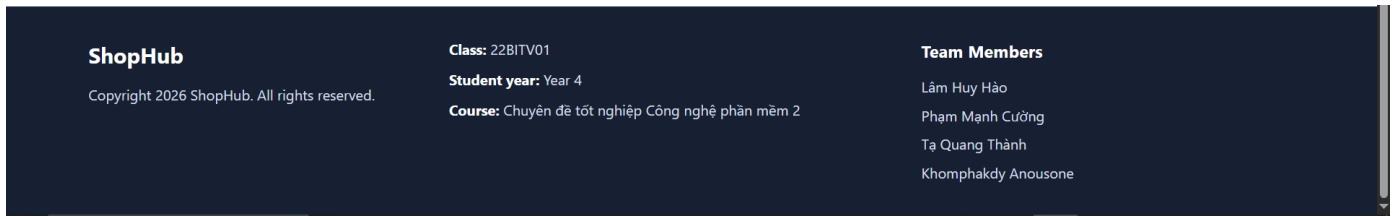

2. Banner

- Displays a main welcome message, e.g. “Welcome to ShopHub”.
- Displays a short description (1–2 lines).
- Includes a call-to-action button (e.g. “Shop Now”).

3. Footer

- Shows:
 - Current year
 - Student name
 - Course name (e.g. “Full-Stack Web Development”)

4. Feature Section

- A section that highlights at least **three features** of ShopHub, such as:
 - Fast delivery
 - Secure payments
 - Multiple shops and categories
- Each feature should have:
 - A title
 - A short description (1–2 lines)

WHY SHOPHUB?

Everything customers expect from an online marketplace

ShopHub focuses on speed, trust, and choice for a simple shopping experience.

01 Fast Delivery Orders move quickly from trusted shops to customers with clear delivery updates.	02 Secure Payments ShopHub keeps checkout simple and protects every transaction with safe payment flows.	03 Multiple Shops and Categories Customers can browse products from many shops and categories in one convenient place.
---	--	--

5. Home Page Assembly

- Combine all components into your main application component
 - Header
 - Banner
 - FeatureSection
 - Footer
